Rectification

Product Description:

Advanced G3 Liquid Compound now offers more cut and a higher gloss finish than ever before. For sheer all-round performance on paintwork defects. Use with water.

Features:

Can be used on fresh and cured paintwork.

Removes P1500 abrasive paper marks.

Improved cutting action.

Less water required during use.

Advantages:

Versatile.

Rapid cutting action & no fillers.

Quickens the process.

Less throw-off reducing clean up time.

Benefits:

Simple & saves money.

Time saving & leaves a permanent finish.

Saves time & money.

Saves time & money.

Application Guide:

Use with:

Advanced G Mop Compounding Foam
Advanced G Mop Fixed Head
Advanced G Mop Polishing Foam
Advanced G Mop Back Plate

AGM-CF
AGM-14/16/58
AGM-PF
AGM-BP

Advanced G3 Liquid Compound

Directions for Use

For best results by machine follow these recommended steps:

- ⌘ Soak Advanced G Mop Compounding Foam in clean water.
- ⌘ Squeeze excess water from foam and fit to a polishing machine.
- ⌘ Spin off excess water until there is no over-spray from the foam.
- ⌘ Apply a small amount of advanced G3 Liquid to the paint surface (about the same size as the flip top on the bottle).
- ⌘ Spread compound onto the panel with foam before starting the machine (reduces splatter).
- ⌘ Begin compounding with a running speed of 1500-1800rpm. Buff until marks have been removed.
- ⌘ Keep the G Mop damp by spraying minimal amounts of clean water from a Farécla water spray bottle. Add more Advanced G3 Liquid Compound if necessary to completely remove the marks.

Optional:

- ⌘ For a heightened gloss finish, leave the compounding residue on the paint surface.
- ⌘ Spray a light mist of water onto the paint surface and run lightly over the polishing area with the Polishing Foam kept flat until the residue has been removed and a satisfactory gloss has been achieved.
- ⌘ Finally, wipe carefully with a Farécla Finishing Cloth.
